Short introduction

Hi, my name is Afonso and I am currently a Full stack .Net developer working at Fegime Portugal.

Working with IT since 2021, most of this time spent as a Full-Stack developer. Always curious and eager to learn.

I Finished a Management and Programming of Computer Systems course in 2021 and since then I have always kept self-learning in multiple fields related to programming. Today I can say that I have developed from scratch to finish two webapps in which multiple users rely every day.
