Short introduction

Working in the IT field since 2021, most of this time spent as a Full-Stack Developer.

In 2021 I enrolled in 2 internships, one as a Full-Stack PHP developer and another as a UX/UI Designer.

Since January 2022 until August 2023, I worked as a Full-Stack .NET developer at FEGIME Portugal, here I was responsible for the planning and development from scratch of a webapp in which multiple users still rely on every day. I was also responsible of maintaining the company database using both SQL and SAP.
