Short introduction

My first contact with a computer was at age 6, and since then I've been engaged with technology continuously. I've always enjoyed tinkering and experimenting with how things work. I started coding at 16, with prior experience in video game modding. As a kid, I didn't have much access to the latest hardware, so I often had to find creative ways to run newer games.

Since 2021, I have been professionally engaged in the IT sector, mainly as a full-stack developer. Over the years, I have worked across areas ranging from UX/UI design to full-stack development.

Currently, I hold the position of Software Developer at VTxRM, a company specializing in software solutions for credit systems. In this role, I contribute to the development and maintenance of the internal code framework and the tools that support developers in their day-to-day work.

Experience

SOFTWARE DEVELOPER AND CONSULTANT | VTxRM | JULY 2024 - TODAY

Working primarily as a framework developer, maintaining the core architecture on which other applications rely and ensuring clean, reusable code that other developers rely on every day. Here I also maintain internal tools used on a daily basis, such as a code generation tool and a low-code web page design Visual Studio extension, among others. Additionally, I contributed to large-scale codebase restructuring initiatives aimed at improving organization and performance.

Technologies: C# | .NET | JavaScript | CSS | SQL | Python | WebForms | DSL | Copilot | TFS | Git

SOFTWARE ENGINEER AND ANALYST | CAPGEMINI | SEPTEMBER 2023 – JULY 2024

Developed customized cloud applications primarily using the Microsoft Power Platform and Azure cloud infrastructure.

Technologies: Power Apps | Power Automate | Azure | CSS

FULL STACK DEVELOPER | FEGIME PORTUGAL | JANUARY 2022 – AUGUST 2023

Designed, developed, and deployed an internal .NET web application providing a suite of operational tools for catalog management, stock control, employee data, documentation, and company communications, supported by a set of REST APIs. Some of these APIs were later extended and adopted by external partner systems as a shared integration layer.

Managed and maintained a hybrid data architecture using both SQL and SAP, ensuring reliable data access and integration across systems.

Technologies: C# | .NET | JavaScript | CSS | SQL | SAP Hana | Vue | Entity Framework | REST API | RSS | Git

FRONTEND DEVELOPER | DIGITALXPERIENCE (INTERNSHIP) | OCTOBER 2021 – DECEMBER 2021

Built responsive frontend websites using a mix of low-code and traditional web development tools, applying modern responsive design patterns.

Technologies: WordPress | Elementor | CSS | JavaScript

FULL-STACK DEVELOPER | WEB & GAMBLE (INTERNSHIP) | MAY 2021 – JULY 2021

Designed and developed an internal billing application optimized for touch devices, with a strong focus on speed and reliability.

Technologies: PHP | HTML | CSS | SQL

Education

PROFESSIONAL COURSE | 2018 - 2021 | ES LEAL DA CÂMARA

Management and Programming of Computer Systems

This course provided a strong foundational understanding of the full computing stack, from circuitry to application development. Key topics covered by year:

1st – Circuitry | Programming fundamentals (C++)

2nd – Object-Oriented Programming (Java) | Operating Systems | Networking | Compilers

3rd – Web Development (PHP) | Computer system building | Error handling

Technologies I have been working with

Technology	Years of experience
C# / .NET	4
JavaScript (including Frameworks)	4
SQL	4
HTML / CSS / SCSS	4
Python	2
Bash / Shell	2
SAP HANA	2
C / C++	1
Azure / Microsoft Power Tools	1
PHP	1

Other technologies and skills I have had contact with:

- React / Vue – Built my portfolio in Next.js and recently migrated it to Vue
- Copilot – Setting up, customizing, and using it for large-scale projects for 2 years
- Linux – Using it as my primary OS since 2022
- Git / TFS – Professional experience with both for version control and collaboration

Certificates

- AZ-900 | AI-900 | PL-900
